

Your fall-encompassing care solution

A virtual care assistant in every room

**Older adults demand constant protection,
complete privacy, and freedom from
buttons and wearables.**

Vayyar care detects falls using
camera-free imaging that
respects privacy at all times.

Integrated with any nurse or
emergency call system, RF

sensors operate 24/7 in all
lighting conditions and even the
steam of a bathroom where fall
risk is highest.

You need never fall short again.

A lifeline for your front line

Our touchless monitoring system gathers essential data that enables care providers to:

- ▶ Reduce liability by minimizing falls
- ▶ Enhance retention by shrinking staff workload
- ▶ Maintain occupancy by cutting care transitions

The final word in falls management

Instant passive fall detection

Eliminate long lies when residents fail to push a pendant button or pull a cord, with full room coverage.

Real-time fall verification

Overcome the issue of alarm fatigue and delayed response caused by false alerts resulting from call system overuse or legacy device malfunction.

Hidden fall identification

Reveal the minor falls that half of residents fail to report and which are the leading risk factor for subsequent serious falls.

Standard solutions are failing residents

Vayyar Care detects falls and summons help. When people can't or won't ask for assistance, you can count on alerts that enable timely intervention.

Put data at the core of care

Vayyar Care delivers the emergency alerts and actionable insights that caregivers need. Instant fall detection ensures rapid

response while visibility into changing activity trends guides more timely and effective clinical interventions.

Emergency alerts

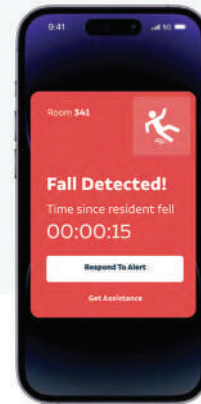

Fall detected

Detect resident falls instantly to prevent long lies that severely impact health and longevity.

Alarm verified

Failsafe fall detection protocol identifies person lying on floor in all scenarios.

Real-time assistance via existing nurse call alert channels

Actionable insights

Recovered falls

Reveal unreported minor falls that are the leading risk factor for future falls, enabling preventative action.

Time in bed

Uncover pain-related insomnia, depression, and reduced mobility and manage respiratory conditions such as CHF and COPD.*

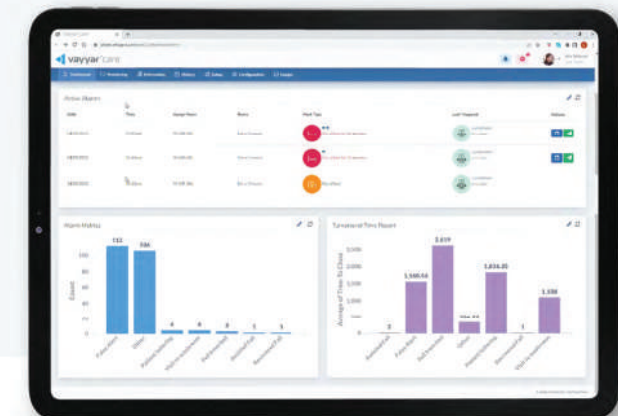

Bathroom visit frequency

Support diagnosis of digestive issues and UTIs that cause low blood pressure, dizziness and even sepsis.

Time in room

Highlight social isolation that increasing the risk of heart failure, stroke, and cognitive decline.

What our users are saying:

► Perfect Peace of Mind

“Vayyar Care brings me peace of mind that if something happens to Dad, he'll get help immediately.”

Joe H.

► A Great Alternative

“My mother had previously tried pendants. She was very frustrated and so this device is a great alternative.”

Evelyn B.

► Verifies Every Fall

“As a professional caregiver, I need to know whether a fall alert is a real emergency. Vayyar Care gives me that visibility.”

Andrew S.

FAQs

Q “Is there a pendant?”

A No, Vayyar Care is a completely touchless device.

Q “What needs to be done once it's set up?”

A Absolutely nothing! Our completely passive sensors work without the need for any additional steps.

Q “Does Vayyar Care respect privacy?”

A Yes. Vayyar Care does not involve cameras or optics, so there's no possibility of privacy being violated or images being hacked.
